

Final V1 document

NEEDIT V1 — CUSTOMER REQUIREMENTS

1. Registration & Verification

- Customer registers using verified college credentials.
- Customer accepts the policy and prohibited-items rules on first login.

2. Profile

- Name, hostel block or preferred pickup point, verified email.

3. Create Request

- Customer can post one or more permitted items.
- Fields: item name, quantity, expected price, notes, alternatives allowed (yes/no), needed-by time, urgent flag.
- Prohibited items are blocked at posting.

4. Request Visibility

- Request is visible to verified helpers only.
- Other customers cannot see it.

5. Request Status

- Open → Accepted → Purchased → Handed over → Completed.
- Cancelled is a separate end state.

6. Helper Acceptance

- On acceptance the customer is notified and a chat opens.

7. Request Locking

- Once accepted, no other helper can accept.
- If the helper releases it before purchase, it returns to the feed.

8. Customer Notification

- Notify on accepted, item unavailable, price change, ready for pickup, completed.
- Pilot workaround: WhatsApp broadcast.

9. Customer-Helper Chat

- In-app chat with text and photos. Phone numbers stay hidden.

- Chat becomes read-only after completion.

10. Item Availability

- Helper can mark an item unavailable and propose a replacement with a photo.
- Customer approves or cancels that item.

11. Price Confirmation

- If the actual price differs, the customer approves before purchase.
- No purchase without approval.

12. Order Tracking

- Customer sees the current status and the helper's first name.

13. Payment

- Item cost and helper fee are shown separately before purchase.
- Payment method for the pilot is UPI. Test the fee level, since willingness to pay was not measured.

14. Handover

- Handover at an approved campus pickup point.
- Both sides confirm with a one-time code.

15. Completion

- Order closes after handover confirmation.
- Optional rating for the helper.

16. Cancellation / Issue Handling

- Customer can cancel before purchase.
- After purchase, cancellation needs helper agreement.
- Helper can release an order before purchase.
- Item unavailable, price unacceptable or order can't be completed: order is cancelled and the customer pays nothing for unbought items.
- "Report a problem" button goes to the club team.

17. Trust & Safety

- Only verified students post or accept.
- Prohibited-items list and policy acceptance.

- Size and value limits for the pilot.

Once an agent accepts, this part covers the private chat, item checks and payment.

Here is the customer journey in three parts, matching the agent flow. The first covers placing the order.

The last part covers delivery, paying the agent, rating and closing the order.

NEEDIT V1 — STUDENT HELPER REQUIREMENTS

1. Registration & Verification [MUST]

- Helper registers using verified college email.
- Helper confirms hostel or day scholar and accepts the pilot rules.

2. Helper Profile [MUST]

- Profile contains name, hostel/day-scholar flag, verified email and contact preference.
- Ratings and history are out of scope for V1.

3. Availability [SHOULD]

- Helper can mark "going out" with a date and time window.
- Collect weekday/weekend/time preferences at sign-up (this is missing from the survey).

4. Request Feed [MUST]

- Helper sees open requests with item, category, "needed by" time and offered fee.
- Feed hides locked or completed requests.

5. Request Details [MUST]

- Each request shows item, quantity, brand/size, price limit, suggested store (optional), "needed by" time and handover point.
- Requester cannot change details after a helper accepts.

6. Accept Request [MUST]

- Helper accepts voluntarily. No penalty for not accepting.

7. Request Locking [MUST]

- Accepting locks the request so no one else can take it.
- Helper can release it before purchase so it goes back to the feed.

8. Customer Communication [MUST]

- In-app chat between helper and requester, with no need to share phone numbers.
- Optional number reveal after acceptance if both agree.

9. Item Availability [SHOULD]

- Helper can mark "couldn't find it" with a reason, and the request is released or cancelled with no penalty.

10. Price Confirmation [MUST]

- Item price and helper fee are confirmed in chat before purchase.
- Fee is shown up front (base plus effort/distance; test ₹20–₹50).

11. Order Status [MUST]

- Four states: Accepted → Purchased → Handed over → Completed, plus Cancelled/Unable to fulfil.

12. Notifications [SHOULD]

- Notify helpers of new requests and status changes. Pilot workaround: WhatsApp broadcast.

13. Payment [MUST]

- Requester pays item cost plus fee up front or before handover, by UPI.
- Helper never fronts cash. Both sides confirm payment.
- No in-app gateway in V1.

14. Pickup/Handover [MUST]

- Handover at an agreed public campus point.
- Both sides confirm handover in the app.

15. Safety & Trust [MUST]

- Only verified students can post or accept.
- Prohibited-items list (alcohol, tobacco, medicines, anything the college bans).
- Size/weight and price caps, plus a written responsibility policy.

16. Issue/Dispute Handling [SHOULD]

- "Report a problem" button that goes to the club team.
- Manual resolution at first.

Here is the agent's journey, split into four short diagrams so each one stays readable. The first covers sign-in to the dashboard.

The next diagram shows what you see on the dashboard and how you accept a request.

Once the chat opens, this diagram shows how the order is fulfilled, including the missing-item path.

The last diagram is the shop-knowledge loop that feeds your chatbot.
